Professional summary

Computer Science undergraduate with experience in full stack development, data analysis, and process automation. Skilled in Python, JavaScript, Java, C#, and SQL, with hands-on experience in React.js, Node.js, Spring Boot, .NET, Docker, and n8n.

Experienced in building data-driven solutions, developing APIs, and automating workflows using structured data. Strong analytical thinking, attention to detail, and ability to translate complex concepts into practical solutions, with a focus on scalable and efficient systems.

Technical Skills

- **Programming Languages:**
  Python, JavaScript, TypeScript (basic), Java, C
- **Frameworks & Libraries:**
  React.js, Node.js, Spring Boot, Bootstrap, Tailwind CSS
- **Data & Analytics:**
  SQL, MongoDB, Data Analysis, Excel (Advanced)
- **Tools & Platforms:**
  Git, GitHub, VS Code, Linux (Basic)
- **Concepts:**
  REST APIs, Data Structures, Automation, Problem Solving
- **Soft Skills:**
  Teamwork, Communication, Problem-solving, Time Management, Proactivity

Professional Experience

Programming Tutor & Instructor

Kodland (Remote) | Jul 2025 – Present

- Teach programming concepts to children and teenagers using structured learning platforms
- Guide students through hands-on projects using Python and Scratch
- Develop students' logical thinking and problem-solving skills
- Adapt teaching strategies based on student performance and engagement
- Ensure high-quality lesson delivery and learning outcomes

Automation & Data Analysis Intern

BrasilHosp | Aug 2025 – Present

- Developed automated spreadsheets and AI-based solutions to optimize internal processes
- Built systems, websites, and chatbot solutions for business needs
- Automated repetitive manual tasks using AI tools and scripts
- Managed data organization, including email migration, domain updates, and data backup
- Contributed to e-commerce development projects
- Improved data integrity and operational efficiency

Technical Support Assistant

Megabyte Multimídias | Feb 2021 – Feb 2022

- Formatted and optimized over 100 computers and mobile devices
- Improved service efficiency by streamlining maintenance processes
- Provided technical sales support, averaging 70 product sales per month

Projects

Game Development

- Developed 2D games using programming logic and custom mechanics
- Implemented game systems such as state management and special abilities
- Focused on performance optimization and clean code structure

Full Stack Web Development

- Built web applications using React.js and Node.js
- Integrated APIs and handled frontend-backend communication
- Applied responsive design and modern UI/UX practices

Education

Bachelor's Degree in Computer Science (In Progress)
Estácio University

Certifications & Courses

- Python Programming – Curso em Vídeo (2025)
- Modern JavaScript – Udemy (2025)
- HTML & CSS – MIMO Platform (2024)
- Getting Started with Data – IBM SkillsBuild (2024)
- Advanced Office Package (2023)
- C Programming – Estácio
- Cybersecurity – HarvardX
- Game Development – NoNeClass
